Breakfast with the Child Health Advocacy Institute

Pediatric Residency Program
August 30, 2017

Objectives

By the end of this session, participants will be able to:

- Recognize how advocacy and community health priorities are determined at Children's
- Discuss community health improvement activities and resident involvement
- Describe how the Child Health Advocacy Institute (CHAI) is integrated within Children's and the community

Let's hear from you first!

Your name and PL year

Residency Program Track

REACH project or other advocacy passion

Career plans

Children's National™

Does this sound familiar?

- 3yo boy with a URI seen in the Emergency Department for the 6th time this year for a non-emergent reason
- 12yo girl, recent immigrant from El Salvador with violent nightmares and signs of depression; no bilingual therapist in your clinic
- A single mother answers “yes” to both food insecurity questions and says she and her 3 kids are staying in a hotel
- An 8yo boy is admitted for an asthma exacerbation; his father tells you that he may have to repeat the school year because he was absent too many times due to asthma

In one word, what is your first thought when you encounter patients like this?

 **Poll locked.** Responses not accepted.

Supporting CNHS community health improvement activities

Defining Community Benefit

A Community Benefit is a program or activity that **provides treatment** or **promotes health** as a response to an **identified community health needs** and meets at least one of these **community benefit objectives**:

- Improves access to health services
- Enhances public health
- Advances increased general knowledge
- Relieves or reduces the burden of government to improve health

Does your work count as Community Benefit?

Educating across the continuum of learners

- Medical Students
 - Lectures to 1st, 2nd, 3rd years; electives for 4th years
- Residents
 - Intern Advocacy Day
 - Community Health Track CHAI rotation
 - Elective CHAI rotation
 - CHAPP pathway
 - New “TEACH” (Trainee Education in Advocacy and Community Health) curriculum
- General Academic Peds fellow workshops
- Faculty trainings in advocacy and population health
- 1st Annual CHAI Symposium in June 2017

CHAPP Pathway

- Menu of activities aimed at building skill and understanding around public policy and advocacy
- Individualized curriculum
- Faculty mentorship
- External partnerships
- 2 levels of participation
 - Certificate
 - Certificate with honors

CHAPP options

- Child Health Advocacy Institute at Children's Elective Block
- Government Affairs Elective Block
- Media and Public Relations Elective Block
- Immigrant Health Elective Block
- Environmental Health Elective Block
- DC Chapter of the AAP Elective Block
- Department of Youth Rehabilitation Services Elective Block
- Health Policy Fellowship
- Global Health Course
- The Advanced Medical Home and Community Leadership
- Community Building Blocks
- Self Study Program
- Health Advocacy or Policy REACH project
- More to come!

Sustaining programs and ideas into policy

- Strategic meetings with decision-makers
- Testifying – DC, MD, VA, and federal governments
- Please reach out to CHAI medical directors (Beers, Dooley, Falusi) before testifying on a policy issue on behalf of CNHS

CHAI Legislative Advocacy Success Stories

Dr. Sharma realizes kids might have an allergic reaction in school but no life saving medicine is available in an emergency

Bill Quirk in CHAI works with Dr. Sharma to prepare testimony for the DC Council to pass a law to have Epi-Pens in schools

As a result of the collaboration between CHAI and the clinical team, a new law is passed in DC so kids will be safer in school

Children's Law Center report (2012) highlights needs and recommendations related to children's MH, several of which note importance of MH integration in pediatric primary care.

Lee Beers works to develop the DC Collaborative for Mental Health in Pediatric Primary Care, a public-private coalition that works to bring a child mental health access program to the District

DC MAP is launched in 2015 offering free mental health consultation and care coordination to pediatric primary care providers

CNHS is one of the nation's leading hospitals in pediatric research funding; this results in increased need for laboratory space

Walter Reed Army Medical Center closes in 2011; CHAI works with federal and local government to secure the transfer of a 13.2 acre research complex to CNHS

How is CHAI helping to address these issues?

- 3yo boy with a URI seen in the Emergency Department for the 6th time this year for a non-emergent reason
- 12yo girl, recent immigrant from El Salvador with violent nightmares and signs of depression; no bilingual therapist in your clinic
- A single mother answers “yes” to both food insecurity questions and says she and her 3 kids are staying in a hotel
- An 8yo boy is admitted for an asthma exacerbation; his father tells you that he may have to repeat the school year because he was absent too many times due to asthma

What did you learn today that you had not seen before?

Is there anything you will do (or do differently) after learning more about CHAI and advocacy at CNHS?

Summary

- Everyone at CNHS is an advocate – across all specialties
- Understanding your patients and community is the first step
- CHAI offers opportunities for residents with any interest and in all tracks
