

## Renal Rotation Rules of Learning

1. Be true to yourself. Recognize that you do not know everything and learning is a life-long process
2. Think globally about your patients, even on a subspecialty service
3. Think critically
4. Do not be afraid to ask questions
5. Learn from your patients. Complement your knowledge with reading the literature, but remember patients may not necessarily follow the "rules"
6. Listen to each of the team members, including the family, before making plans
7. Communicate often and effectively
8. Reflect often
